

Telescopic Extension Handle

MKA-43 Go from 17" to 25" Product # 1854107

MKA-44 Go from 24" to 40" Product # 1854108

INSTALLATION & OPERATION INSTRUCTIONS

Please read these simple instructions before using your new Minn Kota Troll Control Extension Handle.

1. Clamp the Minn Kota Troll Control Extension Handle to the tiller handle of outboard or trolling motor.
2. Make sure that access to kill button is free and clear
3. The Minn Kota Troll Control Extension Handle should be attached and adjusted only when the motor is not operating
4. To adjust to desired length, using two hands, grasp both the clamp and the grip ends of the handle at the same time. While holding the clamp end stationary, twist the grip end of the extension handle to loosen or tighten the handle to the desired position.
5. The Minn Kota Troll Control Extension Handle is intended for use at trolling speeds
6. **DO NOT OPERATE** at higher speeds. Minn Kota recommends that you practice and master steering and throttle control in calm open water before attempting to navigate in congested or confined waterways.

The standard rubber sleeve included with the handle can be removed to accommodate larger tiller handles.

CAUTION:

The Minn Kota Troll Control Extension handle is NOT designed to lift the motor in any manner. Use of the product for this purpose will void the product warranty.
