

Bow Mount Stabilizer Kit - Top Mount

Product #1862013 (MKA-4)

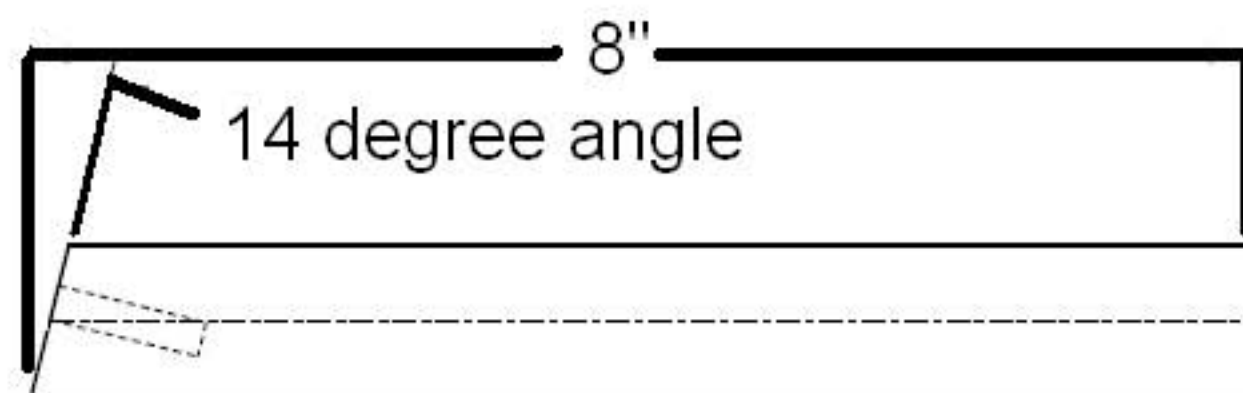

For Maxxum Pro, Maxxum, Riptide Pro or Riptide SM bow-mount trolling motors.

This kit attaches to the top side of the upper arm of a scissors mount. When the motor is stowed, the stabilizer is positioned vertically between the upper arm of the bracket and the deck of the boat. A rubber bumper also protects the deck finish.
