

BOW MOUNT STABILIZER KIT - SIDE MOUNT

Product # 1862012 (MKA-29)

For any Maxxum Pro, Maxxum, Riptide Pro or Riptide SM bow-mount trolling motor.

With a design that attaches between the upper and lower arm of the mounting bracket, this stabilizer pivots into vertical position when the motor is stowed to reduce bounce from heavy chop or wake. It then rotates into a horizontal position along the side upper arm when the motor is deployed. It's saltwater-tested and fully corrosion-resistant.

Manufactured 2007 - Current
